

# Pet Care Guide Bearded Dragon

## Owning A Bearded Dragon!

Bearded Dragons make great pets and are relatively easy to care for. They can live up to fifteen years and the pygmy will grow up to 25cm while the Bearded Dragon can grow up to 60cm long.

### What you need to know!

The enclosure should be at least 90cm x 45cm x 60cm and they love a mixed diet of live insects, fruit and vegetables. Also ensure your giving your Bearded Dragon the right supplements for optimum health.

**Temperature Range:** A dragon needs an enclosure with dual heat zones for good health. They need a hot basking area maintained between 35-40°C. They also need an elevated piece of timber or rock ornament to allow them to bask within 30cm of their heat source. A cooler end of the enclosure should be maintained between 24-26°C and should never fall below 18-21°C during the night.

**Lifespan:** 10 - 15 years

**Food:** Live Insects, Fruit/Vegetables and Pellets

**Special Requirements:** Bearded Dragons need UV lighting, this is critical to their health and development. Talk to our team for the right advice.
