

# Pet Care Guide Guinea Pigs

## Why Choose A Guinea Pig!

Guinea Pigs are great pets. They are a very clean animal and are very easy to handle. Guinea Pigs are a great option where it is impractical to keep other animals like dogs and cats. A guinea pig makes very little noise and if properly looked after, they don't smell.

**Diet:** A daily supply of fresh Guinea Pig Pellets. A fixed water bottle is recommended as it will provide your guinea pig with a fresh supply of water that can't be spilt. We also recommend large water bottles, especially during summer, to keep their water cooler. Vegetables can also be fed as a healthy supplement to your guinea pig.

### Health

Guinea pigs can become infected with worms and if left untreated they can hinder a guinea pig's growth and development. There is also some risk of infection transferring to other pets and humans so we strongly recommend a regular worm treatment, talk to our team about your options.
