

# Pet Care Guide (Land)Hermit Crabs

## Diet Requirements For Your Hermit Crabs!

Like all animals, Land Hermit Crabs have specific dietary requirements. Their main diet should be specially formulated Hermit Crab pellets which contains all the vitamins and minerals they need for a healthy life. As a treat they can also be offered shredded coconut, apple and other varieties of fruit. Ensure they are given fresh food daily.

**Care:** Use an aquarium with a glass top, this creates a humid environment which is essential for Hermit Crab's health and well being. A 35cm aquarium will house up to 3 Hermit Crabs comfortably. The floor of the aquarium should be kept dry and can be covered in either pet litter, untreated wood shavings or clean dry gravel, ask the Taree Pet Barn Team for more care tips.

### Water

A Land Hermit Crab needs two separate water sources in their enclosure, one should be fresh clean drinking water and the other should be salty bathing water and both should be changed daily. Ensure the salt is formulated specifically for Hermit Crabs **DO NOT USE TABLE SALT**
